

Hackberry Heckler
XLI
 January 2023
 Hackberry Men's Shed,
 Carleton Place, Ontario.

***** FIELD REPORTS *****

Babtist Church: A few of the guys have been assisting **Doug** in installing coat racks at the Babtist Church in Carleton Place. Here **Terry R.** Is showing off their handiwork.

Curling Club: The curling club is in need of some boot racks so **Doug** and few of his buddies have been busy putting frames together.

Raspberry JAM: We are well into February now but I thought I'd toss in this photo of our Sopwith with a Pilot

Trainee on the Simulator

***** PROJECTS *****

We've had a visitor of late working on an old stained-glass window, being assisted by **Doug J.** Here you see **Danielle** on the job after a heap of paint remover, heatgun and scraping, in an effort to remove the buildup of paint.

Once the removal has been completed Danielle will be refinishing the wood to her liking.

Garry B. sent along this old photograph of **Al Brown** when he was pumping out walking and hockey sticks for the Christian Farmers. Here he's at Earl Coleman's shop out in Beckwith.

Gord D. brought this lovely piece of carving along to the last breakfast:

The Nintendo game rack, above, was made by **Paul C.** A lot of effort into grooving all those slots and cutting the rails on the table saw.

The second walking stick was finally stained, varnished and glued for pick-up by the customer. This time I was rewarded with an apple pie. I really should have shared it with the shed but you know how it is, a nibble here and a nibble there!

***** TOOLS *****

Jointer: Shown above is the new-to-us jointer courtesy of the Naismith club with a dust collector adapter I believe **Geoff** picked up in Ottawa. The motor came off our old one, while a few of the guys had a hand in putting it all together.

***** FACILITIES *****

***** MISCELLANEOUS *****

Here you see **Terry A.** in the middle of one of his fishing stories.

We spotted these lovely artworks in the window of a downtown craft store. Mostly made from strips of coloured wood, one I particularly liked set inside the metal hoop of a barrel. Hms happens to have lots of scrap wood and there's a heap more up in the loft if this sort of thing appeals to you.
