

\*\*\* FIELD REPORTS \*\*\*

#### \*\*\* PROJECTS \*\*\*

**Fokker-DR1** – There are sources for a few model plans in the **WEB** section, but don't get carried away. One I came across was 50" x 38" which was quite readable when pulled into GIMP but not when printed out on one page. It's possible to chop this up into 10 x 7.5" rectangles but there was only 25 of those. I then tried reducing the plan to 30 by 22.5 leaving only 9 pages to print. This hole is looking deeper every nautical mile.

This photograph shows the collars being turned for the

engine bearings. The bore hole will hopefully fit the engine shaft.

Sunday night, 19:30 hrs and I looking carefully at the engine flange diagram title which might read: 'Kurbeigehausedecket hinten'. Sure enough there's enough there to make out 'covered rear', not the 116mm Dia I'd applied to the FORWARD flange! Oops.

**Hammy Home** – Paul has been commisioned to build yet another hampster home, somewhat larger than the previos incarnation!

**Terry A.** Sends this intriging image of his latest widget. It's a '**meshtastic**' radio, custom 3D printed case and an external ground plane 433MHz antenna waiting to go into service.

We'll let you look that up but maybe sit at the next breakfast table to save getting zapped!

Another piece of art from the knife of **Gord D**. This one really has some lovely curves and fine fingers.

## \*\*\* TOOLS \*\*\*

This space reserved for **Geoff! ...** 

# \*\*\* FACILITIES \*\*\*

We've taken the old door lock to pieces and discovered an ants sawdust **pantry** inside, right over the motors plastic worm gear. Of course this and the small round gear are well greased so it made for a sticky mess and likely slowed things down a bit.

\*\*\* MISCELLANEOUS \*\*\*

# \*\*\* MEMBERSHIP \*\*\*

FYI here are a the direct links Terry has built into our hms e-mail system:
