September 2023
Hackberry Men's Shed,
Carleton Place, Ontario.

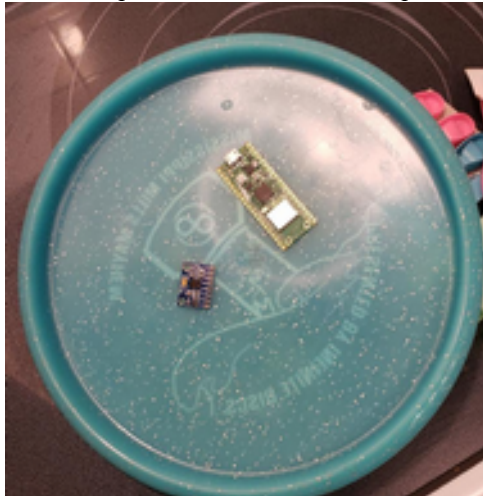

***** FIELD REPORTS *****

***** PROJECTS *****

Doug J. Built this this curling stone sharpener jig for the Carleton Place Curling Club. He found a couple of 'serious' corner brackets in our drawers to help square the back wall. The stone rotates on the marble base against the two rollers.

The jigsaw cabinet, shown in the centre, was built by **Gord D.** It has two cupboards and slots for 14 puzzle trays.

Terry A. is starting a project to mount a RaspberryPi pico W , an MPU6050 accelerometer and battery, to the bottom of a disc golf disc. The goal is to send release-velocity, nose-angle, rpm and temperature from the disc to his Android telephone via bluetooth. Might be something the techies in the group could discuss at a Tuesday evening get together.

Paul C. brought in this oak ski holder to refurbish for the store. It holds up to 4 pairs of skis with 2 shelves for customers helmets, gloves etc.

The latest intarsia project from **Gord D.** is made of padauk (orange), basswood (white) and some dark wood that was kicking around the wood pile.

Dan M. sends along a photograph of the final stages of his first guitar build/modification.

***** TOOLS *****

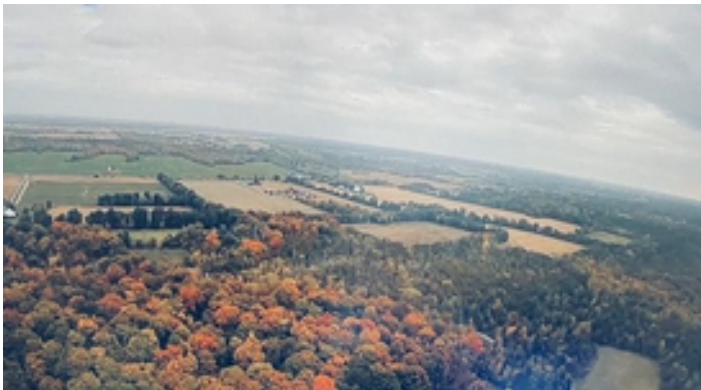

Fokker DR1 starboard aileron being glued. Missing is the tip (this end) and hidden are the fifteen short dowels used to support the joints.

***** FACILITIES *****

***** MISCELLANEOUS *****

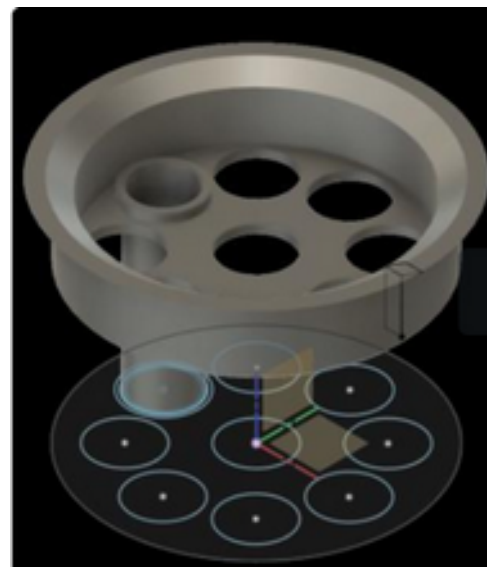

Fergie sends another lovely shot showing the Fall colours as his radio control aeroplane prepares to land.

The following is a Google map of our Mississippi River. We headed North from Almonte looking for a small bay with an island.

Only here is another photograph taken from Fergie's model aeroplane which seems to fit the bill, including the farm outline to the East of the river. The island is about 2.2Km NW of Blakeney Rapids.

Adrian F. and another Shed member are working on a

design for a biologicals cooler project that is intended for health research. Shown is a preliminary design drawing.

***** MEMBERSHIP *****

As Doug presented in a recent e-mail the new Hackberry men's Shed executive consists of:

Doug Johnson,	President,
Tim Pullen,	Vice President
Ray Kamm,	Treasurer
Michael Tobis,	Secretary
Ross Miller,	Member at-large.

Here are a few photographs from the AGM.

MEN'S SHEDS Ontario

<http://www.mensshedsontario.ca/>

Andy Tamas of the Arnprior Shed will be representing Ontario on the National MSC Board of Directors for the

next 2 years. By next March MSC hopes to have charitable status which would mean donations to Shedding would then receive an income tax receipt.

Provincially we are slowly making progress to have MSO incorporated and therefore in a better position to speak to government bodies. This will also mean that all Ontario Sheds who choose to be a "Member Shed" of MSO will be able to get their liability insurance at a reduced rate -- something in the order of half what it now costs us.

***** OUTREACH *****

Craig A. asked if we might help cut out some wooden hearts for an upcoming celebration of the Ukrainian community. Doug tells me the latest heart count is over 300 with several of our members helping with production.

Doug J. Managed to get these heart shaped slices through the planer.

***** WEB *****
