

Hackberry Heckler  
LX  
August 2024  
Hackberry Men's Shed,  
Carleton Place, Ontario.

\*\*\* OUTREACH \*\*\*

Mark R. hard at work with Ross M. supervising on Michael T's garage renovation.

\*\*\* FIELD REPORTS \*\*\*

\*\*\* JIGS & RULES \*\*\*

Don't ask what took me behind our Jointer but here is what I found. The green Ground wire is eaten halfway through, the white Neutral is opened up and the black Live is being worked on. The cable was sat on the belt having been pushed there by the dust pipe. The belt does not have a cover, the cable was not secured. The cable ran between the wall outlet and the Jointer switch, it was very much **alive**.

During the pumpkin blitz a guide bearing **fell** off the smaller bandsaw along with a sprinkle of 2.4mm ball bearings. The assorted bits were taken home to see if the lab' stock might match the errant part. A 15mmOD with 6mmDia shaft were soon donated to the cause and reinstalled all within half an hour!

\*\*\* FACILITIES \*\*\*

\*\*\* MEMBERSHIP \*\*\*

Al B. is assembling a rabbit hutch for one of his granddaughters. Here it awaits the corner trim.

Doug J. et al have been busy cutting out a zillion pumpkins for a Town project.

'software defined radio'. This lets the software set the tuning frequency and even includes a small display which he was able to demonstrate. The box he showed us is mostly 3D printed (grey and yellow) with old copper clad circuitboard top and bottom. This is well on the way and only pending a couple of more chips to complete the circuitry.

The second is a white birch wall hanging, seen here in the morning sun.

Breakfast at St. James can be a tad busy especially when the orders are incoming re this feline coat rack, one of two **Doug J.** said **YES** to.

In the background is **Shane E's** weekday hotrod!

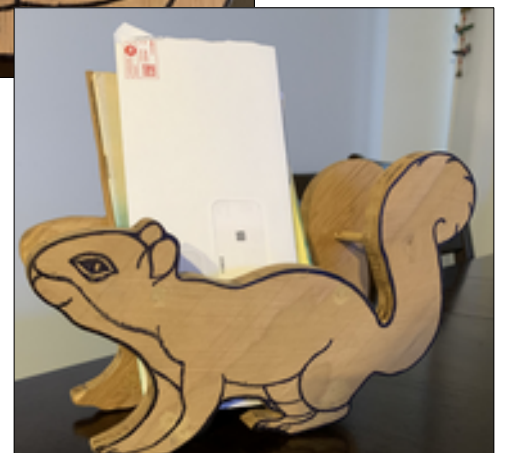

**RC S.** sent in this phone charger he recently cut out along with the mail slot shown below.

**\*\* PROJECTS \*\***

Two projects from Terry. A. this month. First uses RaspberryPi Pico processor to make a

**Fokker DR1 - Wayne B.** turned up with two 12" wheels the other day suitable for the undercarriage. They each have a pair of 1/2" bearings and a removal hubcap.

**Rob M.** has already produced a couple of prototypes on a 3D printer for the cap replacements.

**John F.** sent in this photo' of the fuselage now

parked near the sheds ceiling. He's now looking into the skin requirements.

**Al B.** has already sanded the outer corners.

\*\*\* MISCELLANEOUS \*\*\*

☉☉ **Upcoming Breakfasts:** ☉☉

7:30 a.m. Tuesday **24th** September  
( see E for Eggs on shed sign-in sheet)

**Al B.** and company recently enjoyed an early morning trip to the Ottawa Equestrian Centre on Corkstown Road to watch a granddaughter compete.
